

PetroMaterials®

## *Corporate Profile*

## **Message from the President & CEO**

PetroMaterials Corporation, widely known as “PMC”, is the one and only supplier and manufacturer of OCTG (Tubing and Casing) and Drilling Tools (Drill Pipes, Drill Collars and Heavy-Weight Drill Pipes) in Japan.

In 1994, we started our business with export of Japan-made OCTG, including Sumitomo Metals’ High-End Seamless Pipes to oil and natural gas industry all over the world, particularly in China, taking advantages of our well established access to the rapidly growing market.

Along with our business expansion, we, on top of export business, moved into a manufacturing/processing business in order to supply the products with our original brand, with new considerable investments in the plants both in Japan and China.

Today, with the head office in Tokyo, we also have a manufacturing/processing plant-PetroMaterials Wakayama Works in Wakayama, the western part of Japan, and a full subsidiary called PetroMaterials (Cangzhou) Co., Ltd. in China.

What makes us unique is that we can provide an One-Stop Service to the oil development industries in the global market by providing the high-end Japan-made OCTG as well as high quality Drilling Tools manufactured by ourselves in our modern plants in Wakayama, Japan and Cangzhou, China.

To meet with rapidly changing business environment and the demand, we are carrying right and just enough inventories at our own risks, including standard API Casing and Tubing in the widely required metal compositions and grades, coupled with customized connections.

Raw materials for OCTG and Drilling Tools are all supplied to us by the top Japanese or American mills including Sumitomo Metals, JFE Steel, Nippon Steel, and Timken.

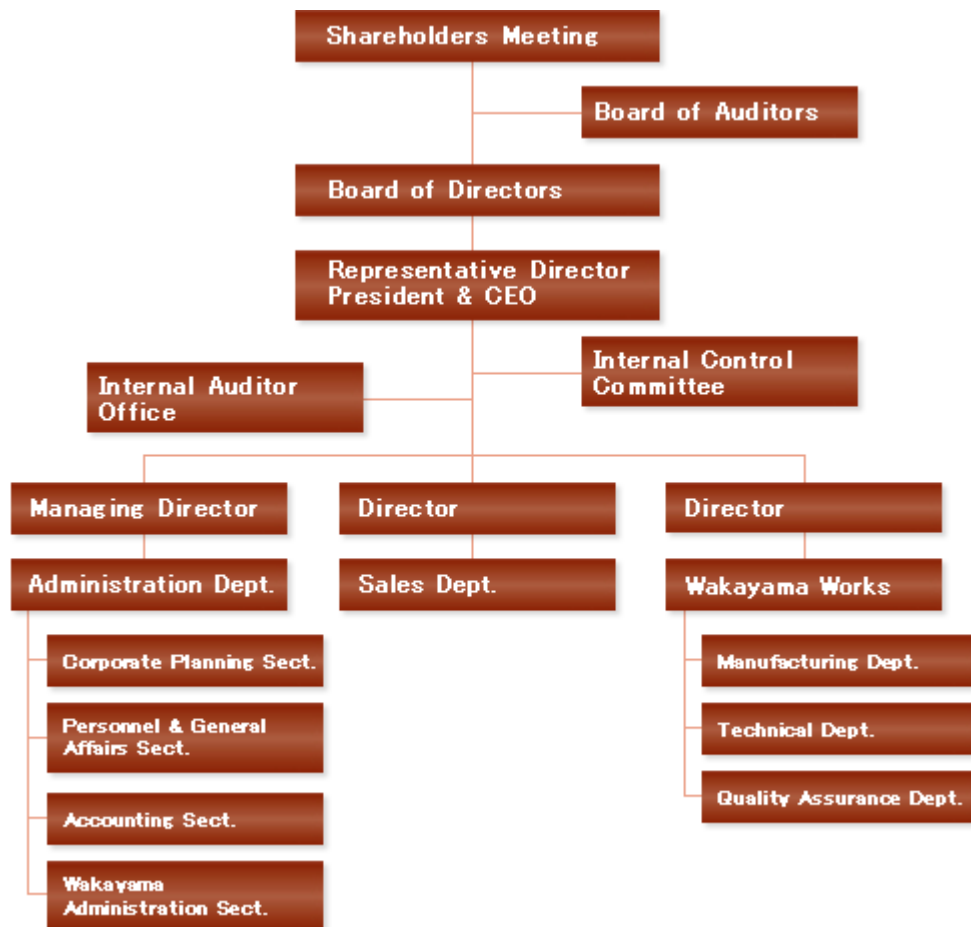

For the development of oil and natural gas industry worldwide, we assure our business associates, suppliers, customers and end users, of timely delivery of the products and the best service at all times.

Seika MIYAKE  
President & CEO
